

Heavy-duty 50DA air-cooled brushless alternator

Get a 50% improvement in efficiency, reliability and service life!

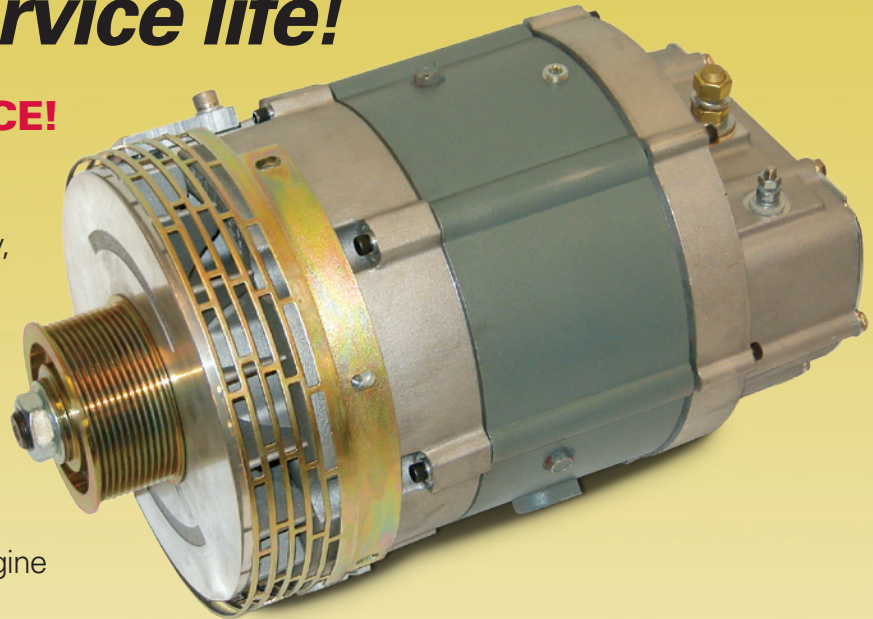

SPECIAL INTRODUCTORY PRICE!

Convert to our new 50DA air-cooled brushless alternator for a 50 percent increase in efficiency, reliability and service life over an oil-cooled alternator. The heavy-duty brushless construction design increases reliability and service life because there are no rotating windings. Moreover, the 50DA alternator is resistant to high levels of vibration, and requires only regular maintenance between engine overhauls.

Other benefits include:

- ✓ **Improved fuel mileage**
- ✓ **No more oil leaks**
- ✓ **Reduced service time**
- ✓ **Drop-in replacement**

Installation is easy! Simply remove the old 50DN alternator and alternator oil lines, and mount the new 50DA air-cooled alternator to the existing cradle. The kit includes a new alternator cable, a support bracket and cable clamps.

Specifications

- **325-Amp, 24-Volt**
- **Maximum speed: 6,500 RPM continuous, 7,000 RPM intermittent**
- **Polarity: negative ground**
- **Rotation: Clockwise / Counter clockwise**
- **Mounting: Belt Drive Radius**
- **Weight: 95 lbs.**
