

Section VIII

Remote Control and Emergency Brakes

The remote control unit on the Blue Bird chassis is smooth functioning and requires little maintenance if properly serviced. Never force gears and always keep properly lubricated with a medium grade oil. Check the unit monthly for proper oil.

The Emergency brake is a positive action, self-adjusting type with the handle located to the left of the driver. It is easily adjusted from the driver's seat by the Knob at the top of the handle.

Illustrations and parts list are included to aid you in ordering the correct replacement parts for your chassis.

IMPORTANT..... When ordering parts it is always necessary for you to give the engine make and model, the date your bus was purchased, and complete description and location of the part needed, plus the part number and manufacturer.

ALWAYS GIVE PART NUMBER FOR EACH PART AND COMPLETE DESCRIPTION AND MANUFACTURER WHEN ORDERING PARTS.
